## Commonwealth of Massachusetts.

INSURANCE DEPARTMENT, BOSTON, May 3, 1888.

To the Honorable the Senate and House of Representatives:

Herewith is transmitted Part II of the Thirty-third Annual Report of this department relating to life and casualty insurance, presenting tabulations showing the condition of the several companies transacting business in this Commonwealth at the close of the year 1887, with the character and volume of business during the year. The report includes also the business of the assessment corporations, and, so far as reported, of the fraternal associations possessing beneficiary features.

#### LEVEL PREMIUM LIFE INSURANCE.

The year has been in many respects a remarkable one, the increase in the number of policies issued and in the amount of insurance in force being far in excess of any year in the history of the business. The aggregates present the enormous figures of 890,938 policies in force at the close of the year, with insurance to the amount of \$2,413,998,133, a net gain during 1887 of 78,818 policies and \$245,951,407 in insurance. figures do not include the industrial business of the John Hancock, the Germania and the Metropolitan, aggregating 1,560,-087 policies covering \$172,834,887 in insurance. The gain for the year amounts to one-seventh of the whole number of policies and one-sixth the entire insurance in force in the same companies ten years ago. A very considerable portion of this increase is due to the vigor with which three or four of the larger companies have pushed their business in foreign lands, a growth in a degree yet experimental, and in some respects to be viewed with solicitude.

The character of some of the business has notably changed from the previous year. Comment was made in the last report upon the fact that while in Massachusetts in 1886 the policies of the Mutual of New York averaged \$2,550 each, those of the Equitable showed an average of \$7,450. For 1887 the Mutual wrote 956 policies in Massachusetts, averaging \$2,956, an increase of \$406 each over the previous year, while the Equitable wrote 1,032 policies at an average of \$4,455, an average decrease of \$2,995 per policy. The average of all the issues of the twenty-six companies was \$3,102 in 1887 against \$3,062 in the previous year. The change first noted is a healthy indication that the general business is being more closely confined to legitimate life insurance with less taint of purely speculative features.

#### Massachusetts Business.

During the year 9,350 policies were written upon lives in Massachusetts, covering \$26,621,852 of insurance, a slight falling off from the previous year. At the close of the year 1887, not including the industrials, there were in force upon Massachusetts lives 64,536 policies for \$176,802,718; of this amount 18,030 policies are by the five domestic companies and 46,506 by the twenty-one companies of other States. During the year \$3,244,507 was paid in the State upon matured claims, \$677,194 of this being by the domestic companies.

#### OUR DOMESTIC COMPANIES.

Each of the domestic companies shows a handsome increase in business, although in ordinary life the John Hancock presents a small falling off, but its industrial branch presents an increase of nearly \$6,000,000. These companies have now in force 64,181 policies, covering \$167,284,758 of insurance, not including the 203,467 policies of \$23,802,502 in amount, of the industrial insurance of the John Hancock. Their gross income exceeded expenditures during the year in the sum of \$1,991,088 and the surplus was increased \$41,268. In every respect these companies are in a gratifyingly stable condition. The results of the triennial examinations of the New England, the Massachusetts and the State are given elsewhere.

#### Industrial Insurance.

This, which seems entitled to be considered as a special branch of the insurance business, continues to grow in public estimation, and, properly conducted, is a legitimate and commendable enterprise. The increase during the year is shown by the following:—

		1	886.	1887.			
		Policies.	A mount.	Policies.	Amount.		
John Hancock,		148,850	\$17,805,910	203,467	\$23,802,502		
Metropolitan,		1,066,875	119,560,338	1,345,125	147,758,287		
Germania,		16,214	1,736,294	11,495	1,274,098		
Total, .		1,231,939	\$139,102,542	1,560,087	\$172,834,887		

The character of this business is in a measure shown by the amount of the policies, those of the John Hancock averaging \$112; of the Germania, \$111; of the Metropolitan, \$109. There are two items in the methods of these latter companies which should be reformed. The provisions of the application, so far as forming any part of the contract, and the entire policy should be printed in type sufficiently large to be legible to ordinary eyesight. Printing important conditions in an obscure way in the smallest known type should not be permitted. Massachusetts has established a uniform size of type for fire insurance policies, and nothing less, surely, should be permitted in these contracts of greater moment. And if, as in case of the policies issued by the latter company for the lesser amounts, risks are taken without a medical examination, alleged misrepresentation by the applicant - who in a large number of these cases is made to understand next to nothing of the statement he is asked to sign — as to his physical condition, ought not to be permitted as a bar when a claim arises. Misrepresentation by the agent and misunderstanding by the assured now lead, under the methods thus pursued, to almost innumerable cases of hardship and injustice.

#### THE MASSACHUSETTS STATUTE.

The insurance law, prepared with so much conscientious care by the late commissioner and the legislative committee of last year, some of the provisions of which then met with vigorous opposition from a number of the companies, is, in its practical operations, abundantly attesting the excellence of its construction and the wisdom with which it was framed. While under consideration, some of the larger life companies earnestly protested against the proposed provision for valuation of assets as certain to unfairly affect the standing of the companies. As this provision does not, by the terms of the act, take effect until the close of the year 1889, the present Commissioner deemed it wise to practically work out a solution of the problem. Aceordingly, all of the life companies transacting business in Massachusetts were requested to furnish a detailed statement of assets, under the limitations of section eleven, and the valuation was computed conformably thereto. The result fully justified the entire equitableness of the provision, and determined beyond question the absence of ground for alarm on the part of any one of the companies; the list of actual figures may be safely put against a volume of theory, - the positive is, against the possible may be.

#### THE CONTINENTAL. — THE VINDICATION OF EVENTS.

Nine years ago the examination by the Massachusetts department of the condition of the Continental Life of Hartford, revealed a condition of unsoundness and methods of dishonesty, and the license of the company to do business in this Commonwealth was revoked. The statements of the company had been accepted by other departments and the crookedness of the transactions might have escaped attention but for the policy-record and valuation system of Massachusetts, carried out by no other State department. Immediately upon the revocation of the license of the Continental, the then insurance commissioner of Connecticut issued a certificate that the company was not only absolutely sound, but most economically managed and worthy entire public confidence. Not a few Massachusetts policy-holders were induced by this official en-

dorsement of the insurance department of the State in which the Continental was located to continue their payments, and thousands of dollars have since gone into the coffers of a concern known by this department to be absolutely rotten. During the past year Commissioner Fyler of Connecticut was led to courageously make a searching and exhaustive examination into the affairs of this company, which revealed a startling condition of dishonesty and fraud; once thoroughly probed, only shameful misappropriation and mismanagement were revealed. The president of the company fled before the exposure and is yet a fugitive in foreign lands; other of the officers are under criminal indictments, and the Continental has been placed in the hands of receivers to be closed, with prospect of but small dividends for the policy-holders. The vindication of the action of the Massachusetts Insurance Department came tardily but with emphasis.

#### THE HOMEOPATHIC LIFE.

The revocation in 1886 of the license of this company to transact business in this Commonwealth, and the sharp criticism by the Commissioner in the report of last year, have been fully justified by the action of its officers since. An examination of the financial condition of this company was made by the insurance department of New York during last year, and the superintendent thereafter issued a circular stating that there were sufficient assets to meet in full every existing obligation. But the officers have continued their censurable conduct in attempting to terrorize policy-holders into an extinguishment of their claims for sums far below actual value. By this iniquitous plan of procedure the company has already swindled policy-holders out of a sufficient amount to make good the serious impairment, and the hope clearly is to enable the managers to save from the wreck something for themselves at the expense of those whose interests they were bound sacredly to guard. It is a pity that some provision of law cannot prevent these pernicious practices, save the people from imposition, and the system of life insurance from the resulting scandal.

FIDELITY INSURANCE. — THE RESERVE QUESTION.

The subject of reserve or unearned premium charge in the statement of liabilities of fidelity companies was under consideration at the two last sessions of the convention of State insurance officials, and a committee was appointed who reported their conclusions as follows:—

We conclude that certain liabilities upon the bond of an administrator or curator are continuous and cannot be terminated at the pleasure of the bondsman, that the maximum duration of such liability can only be ascertained after the lapse of time — that the maximum duration, however, may be closely approximated. liability being continuous, and not terminable even by consent of parties or otherwise except by lapse of time, the contract necessarily runs for a term of years, and under the rule as established governing other branches of insurance would be chargeable at least with an unearned portion of the premium covering the unexpired time for which it was to run. To do this, however, would be at once a bar to their continuance in business. And this class of insurance (if it may be so called) being as yet in its very tender infancy, and the mere beginning of an experiment, we are not prepared to say that a liability estimated upon the basis of a one-year contract is sufficient, nor are we willing at this time to advise a prohibition of the business by applying to it the rule by which the solvency of a company engaged in other brauches of insurance is sought to be ascertained.

We beg to suggest that this class of corporations should be under the immediate and sole supervision of the courts, and that their responsibility be ascertained by the same means as now applied by law to individuals seeking to act in a like capacity.

They, however, having, by some inscrutable means, been placed under the supervision of the insurance departments, your committee would recommend that for further information and proof of their sufficiency, such companies be for the present merely required to file with their annual statements a full and complete list of the bonds upon which they have become surety, together with a detailed schedule of securities held by them as collaterals.

As will be observed, the committee suggest no definite rule for computing the proper reserve charge, but intimate that further experience is necessary in order to a just and intelligent treatment of the subject.

The business of guaranteeing the fidelity of persons in posi-

tions of trust and of acting as bondsmen upon contracts and appeals is at present carried on in this Commonwealth by three companies, all foreign corporations.

The great convenience that such companies, if properly conducted, must be to the business public is at once apparent, and when their plans are matured by the needed experience and become popularized, there can be no doubt that the business must become a large and important one.

Unlike that of any other kind of insurance, the hazard insured against is almost entirely a moral one, and in the absence of tabulated experience showing the average percentage of roguery in the business public, the work of fixing the rate of premium to be charged must be largely conjecture, and the rates would vary according to the optimistic or pessimistic predilections of the actuary.

But, whatever the size of the premium may be, the reserve or uncarned portion of it to be carried in liabilities should follow logically and by fixed rule. The guessing, if any is needed, should be confined to the construction of the premium and not allowed in computing the reserve.

Under the laws of this State, in order to determine the amount which must be charged as unearned premium in making up the account of liabilities of any company except life, marine and real estate title companies, it is required to take fifty per cent. of the premium as written in the policy.

This method proceeds upon the general assumption that the business of a company is uniform in amount and kind, and for fixed periods; and that lapse of time alone diminishes the probability of the happening of the event insured against. But this seems hardly logical as applied to certain forms of contract issued by the fidelity and casualty companies.

The business of fidelity insurance is comparatively new, and little attention has been given heretofore to its peculiarities and the proper plan of computing its liabilities by the insurance departments. By the present practice it is lumped in with the various forms of casualty insurance, and the uncarned premium estimated by making time the great factor.

In fire insurance, where the property is in sight all the time, it may be said, other things being equal, that the risk of loss in six months is only one-half as great as in twelve months, and

.

therefore time is an essential factor in earning the premium. On the other hand, in marine insurance where the risk is taken upon the passage and the property is out of sight from one end of the policy to the other, it can never be known that any portion of the premium is earned until the voyage is ended; prudence requires, and the universal practice is to keep the whole premium untouched until the end of the undertaking.

The cases are entirely analogous in fidelity business. Where periodical examinations are made during the continuance of the risk, and it is known from time to time that no loss has been made, no doubt the proportionate part of the premium is fairly earned, as in fire insurance. But in case of court bonds or trust risks, where the estate is held by curator or trustee and no examination is made until the termination of the trust, time is not a factor in earning any portion of this premium. An estate is to be held by a guardian for an indefinite term of years; if he is weak or wicked he may misplace a portion of his trust in the first year, or he may be planning for a more convenient appropriation later on, - in either event the fact cannot be known until the end of the trust, when final accounting is made. But the insurer undertakes to keep the estate harmless, and he computes the premium from his knowledge of the chances of the happening of such losses, —the risk is almost wholly moral. It follows, then, as in a marine risk, that the entire amount of premium stipulated to be received for the whole risk must be regarded as unearned while the bond is in force.

The same is also applicable to policies covering such financial risks as appeal bonds in the courts, contractors' agreements and the like. They are in a degree perpetual risks, for the policy must be regarded as a whole, and no portion of the premium can be considered as earned and covered into surplus until the final decision and settlement of the appealed case, or the acceptance and discharge of the completed contract.

The company undertakes that the trustee will faithfully perform his engagements in relation to the trust; presumably the obligation is not to be voided by the action or neglect of the trustee, and that his failure to meet the instalments of premium would not affect the contract unless the party to be protected agrees to be responsible for such payments. The recourse of the company would be through suit to compel pay-

ment, and not through cancellation of the risk, as is possible in other kinds of insurance.

It would seem, then, that the unearned premium on such a policy, at any time, should be the total premium estimated as adequate to the whole undertaking. And if it is conditioned that the premium is to be paid in yearly or other instalments, the reserve charge at any time may be offset by the amount of the instalments then deferred or forborne.

#### SUITS AND PENALTIES.

During the year the department has instituted a number of prosecutions against individuals and companies for violations of the Massachusetts statute; in each case the offence has been proven or admitted, and fines imposed and paid. There is at the present time a general disposition to cordially comply with legal provisions in the transaction of business within the Commonwealth.

# The Question of Valuations.—A Word with the New York Department.

Some weeks since the insurance committee commenced a hearing upon an order requesting them to consider the expediency of permitting the Insurance Commissioner to accept the valuation of life policies as made by other departments. The gentleman at whose suggestion the order was introduced be came convinced of its undesirability, and no one appearing to advocate its adoption the committee declared the hearing closed. One of the members, however, who was unfamiliar with the subject, asked the Commissioner if he would explain the difference in the valuation methods of the Massachusetts and other State departments, which, in an entirely informal and unofficial manner, the Commissioner proceeded to do. The committee voted unanimously "inexpedient to legislate," and the report was unanimously accepted in both branches.

On the appearance of the official report of the superintendent of insurance of New York, for the current year, it was found to contain the following extraordinary philippic:—

"While on this subject it is in order to notice a statement reported by a Boston insurance journal on the 10th ult. to have been made by Mr. Merrill, the Insurance Commissioner of Massachusetts, on the 6th ult., before a legislative committee of that State, in reference to policy valuations by this department."

"The published report referred to it as follows:"-

"The committee next considered amending section 11 of chapter 214 so that the Insurance Commissioner could, at his discretion, accept the valuation of the policies of life insurance companies of other States from the insurance departments of such States. This order was indiscreetly introduced on the last day open to the presenting of orders and is not favored by the committee. No one appeared in its favor. Commissioner Merrill forcibly explained to the committee the character of the order and its dangerous nature. He stated that the Massachusetts Insurance Department was the only department in the Union which made and kept a complete valuation of the policies of life insurance companies doing business in the State so that at any time from year to year, by a comparison of figures, the ability of every company to fulfil every individual contract could be ascertained. It would be a most dangerous thing, he stated, to enact this order, for the Commissioner would be under obligations to accept the valuations of other State departments which were not responsible. Speaking of the method of valuation in the New York department he said that companies furnished lists of policies, which were valued and returned without any record being kept by the department. Under this system a company might infuse a fraud amounting to millions of dollars into the returns so made, which, under the Massachusetts system, could not be done. And therein this State stood as a safeguard between the companies and the policyholders, for, though fraudulent management might deceive their departments, the fraud or discrepany could not pass the comparisons made by this department."

"This public statement, alleged to have been made thus officially by the head of the insurance department of another State, is so totally unwarranted and so absolutely untrue that it becomes a proper subject for correction in the official manner here adopted. The policy valuations of this department are made upon descriptive lists of all the policies in force issued by the companies reporting to this department, entered by each company upon blanks prepared by the department in such a manner as to show a complete description of each policy, its number, date of issue, age at issue, style of policy, style of premium and amount insured When thus filled up, as of December 31 of each year, the correctness of the lists are sworn to by two proper officers of the company and forwarded to the department. The valuation thereupon made by the actuary of the department is inserted in a proper column opposite each policy, showing its present value on the last day of the year. This process is continued each year, changes in and additions to the lists being made and sworn to by the proper officers of the company for each successive valuation."

"These lists are not surrendered to the companies, but as they accumulate they are bound in stout folio volumes, and are preserved as records in the department; so that the condition and value of any policy on the preceding thirty-first day of December may be seen by any person at any time consulting the records of the department."

There is no pretense that the statement so violently assailed is found in any official paper, nor anywhere over the signature of the Insurance Commissioner of Massachusetts. It is a mere newspaper report, a statement "alleged to have been made." The telegraph wires between Albany and Boston were open and unobstructed; several mails pass daily between the two cities. It would probably have occurred to the head of any other department than that of New York that official courtesy, ordinary fairness, common decency even, would suggest that an inquiry be made of the Commissioner of Massachusetts whether this newspaper report, this statement "alleged to have been made," was correct, before rushing into an official report with accusations as to "totally unwarranted and absolutely untrue" suggestions. But the possibility of a negative reply would have destroyed the opportunity to blow the trumpet in laudation of the New York department, and therefore, with no suggestion, no request for information as to the correctness of this newspaper statement "alleged to have been made," we have the foregoing denunciation, which, under the circumstances, borders pretty closely upon official brutality.

The Commissioner of Massachusetts seeks no controversy with any other official, but he does not propose quietly to submit to any such outrage as the foregoing.

What the Commissioner did say to the committee was this: That the Massachusetts Insurance Department was the only one in the country which had, practically from the beginning of the business of life insurance, its own complete history of all the policies, retaining in its own possession, all of the time, this policy record, — not allowing it to pass into the hands of the companies for possible manipulation. The policy lists in this department have been in use thirty years. Annually the several companies furnish, upon sheets provided by the department, the new policy issues, seriatim, and the year's his-

tory of all the old policies. From these sheets the alterations, changes and additions to the policy registers, and then the valuations, are made in this department, the registers never going out of the possession of the insurance department.

Does the superintendent of insurance of New York pretend that the practice of his department is not materially different from this? By pretty strong implication he does. The paragraph we have quoted asserts, "These lists are not surrendered to the companies." Well, if by "surrendered" is meant full, final, absolute surrender, the statement is true; but for weeks, if not months in every year, these lists are sur-RENDERED by the New York department to the several companies for changes and alterations, and for manipulation if suiting the purposes of the company, as has been done in several instances heretofore, and without the chance of detection by that department. "They may be seen by any person at any time consulting the records of the department." On the contrary, there are weeks, if not months in every year, when the New York department strips itself absolutely of these lists, distributing them over the country to the companies.

It is presumed that there is some method in the New York department, and that it is the same for all of the companies with which it deals; at all events its system is no stronger than its weakest part. The following letter was addressed by the Commissioner of this State to the presidents of the five Massachusetts companies:—

INSURANCE DEPARTMENT, BOSTON, April 16, 1888.

DEAR Sir, — Will you please inform this department what has been the custom of your company in past years, and especially in the year 1887, in making returns for valuation purposes to the New York department?

Do you give each year the policy history and new policy issues upon separate sheets, as made to this department, or do you make up the history upon the official records of the New York department, the same being forwarded to you by the latter for that purpose, and after additions, alterations and changes made by you, the sheets being again returned by you to the New York department?

An early answer will be appreciated.

Respectfully yours,

GEO. S. MERRILL, Insurance Commissioner.

The following are the replies received (the italic is supplied):—

THE MASSACHUSETTS MUTUAL LIFE INSURANCE COMPANY,
Springfield, Mass, April 17, 1888.

George S. Merrill, Esq., Insurance Commissioner.

Dear Sir, — In answer to your inquiry, addressed to President Edgerly, I have to state that this company's policy returns for valuation purposes are made to the State of New York upon registers belonging to the New York department, the several volumes of which are sent to this office in the latter part of the year; and, after new policies have been entered and cancelled ones marked off, are returned to the department with a sworn certificate as to their correctness.

Yours respectfully,

OSCAR B. IRELAND, Actuary.

NEW ENGLAND MUTUAL LIFE INSURANCE COMPANY, Boston, April 17, 1888.

Hon. George S. Merrill, Insurance Commissioner.

Dear Sir, — Your favor of the 16th instant is received. The superintendent of insurance of New York keeps registers of our policies, supplemented by a schedule of paid-up additions similar to that of Massachusetts, which are forwarded to us to have supplementary terminations and changes made thereon by us. They are usually forwarded once a year only, but in 1887, or for the corrections of 1887, they were forwarded twice.

Very truly yours,

Benj. F. Stevens, President.

JOHN HANCOCK MUTUAL LIFE INSURANCE COMPANY, Boston, April 17, 1888.

Hon. George S. Merrill, Insurance Commissi ner.

Dear Sir, — Replying to yours of the 16th inst., I beg to say the data of policies in what we designate as our regular business is given to the New York department upon registers furnished by that department. These registers are annually sent to us, we make the additions, mark off the terminations and return the same. In our industrial branch we group the policies and send the sheets to the New York department precisely the same as we do to the department of Massachusetts.

Sincerely yours,

S. H. Rhodes, President.

STATE MUTUAL LIFE ASSURANCE COMPANY, WORCESTER, April 17, 1888.

Hon. George S. Merrill, Insurance Commissioner.

DEAR SIR, — In reply to your favor of yesterday, addressed to the president of this company, the registers of the policies of this com-

pany for New York State are BOUND VOLUMES WHICH ARE SENT TO THIS OFFICE before the close of the year. After the year has closed they are posted to its close, being made to conform to the registers of the company, and then returned with a sworn certificate which is attached to the register subsequently by that department. From said registers the valuation is made. All changes of every character are indicated on said registers. This is the plan which has been followed for many years.

Very respectfully,

H. M. WHEELER, Assistant Secretary.

THE BERKSHIRE LIFE INSURANCE COMPANY,
PITTSFIELD, April 17, 1888.

Hon. George S. Merrill, Insurance Commissioner.

Dear Sie, — In reply to your favor of the 16th inst., I would say that this year the New York department sent us new books and we made them up. For several years they have sent their old books and we have corrected them, and it is our expectation that it will be several years before new registers are again called for.

As I understand it, your department is the only one which makes use of separate sheets. Very respectfully,

JAMES W. HULL, Secretary.

The question of official courtesy answers itself; the letters above quoted are a sufficient reply to the accusation as to statements "alleged to have been made," "totally unwarranted and absolutely untrue."

#### Fraternal Societies and Assessment Insurance.

In compliance with a resolve of the last Legislature the Insurance Commissioner submitted to the General Court of the present year a special report, with draft of a bill governing assessment insurance, in which the corporations engaged in these transactions as a business were separately classified from the fraternal societies. After a hearing before the insurance committee the Commissioner made an absolute division of the subject, and two bills, one for assessment insurance, the other relating to the transactions of purely fraternal beneficial associations, were submitted and are now pending. The following suggestions in that report may not inappropriately be presented here:—

Insurance upon the assessment plan, including that of lodges and other fraternal societies, has grown up in this Commonwealth, mainly under various amendments, engrafted from time to time upon chapter 115 of the Public Statutes, and entirely foreign to its original purpose. It is certain that the provisions in relation to disability and death benefits, as added to this chapter, did not contemplate, and it is doubtful if they authorized, the organization of other than fraternal associations; but the rapid growth in numbers and strength of distinctly business corporations, effecting contracts of insurance upon the assessment plan, seemed to indicate a public demand, if not necessity, for their existence, and the Legislature in 1885 enacted a law for their government and control, but specifically exempting from its provisions such associations as were purely fraternal in character. The Statute of 1885 was the earliest comprehensive law upon the subject passed by any Legislature, and the only considerable criticism upon it has been as to the strictness of its provisions. It has operated so satisfactorily that it has been enacted entire, or its provisions made the substantial basis of a similar law, in a number of other States, and it would be difficult to suggest any material change in the statute likely to more wisely govern and control this class of corporations.

In relation to the fraternal organizations it has thus far seemed to be the policy of the Legislature to regard them practically as family associations, and the law has simply provided for their organization, defined the class of certificates and beneficiaries they might include in their transactions, and required a brief annual report to be published, purely as a matter of information not otherwise easily attainable by the public. It would hardly seem advisable to attempt more than this, although the frequently expressed desire on the part of some of the larger of these associations for the creation of a reserve fund, greater in amount than that permitted by the present law, of the sum realized from a single assessment upon the entire membership, necessitates serious consideration as to the safety, no less than the expediency, of authorizing a large accumulation, by corporations, and for purposes, over which the Commonwealth exercises practically no control. Whether it is desirable, in any event, to attempt further supervision by the insurance department of these fraternal organizations, is more than doubtful.

From the manner in which the assessment business has grown, creating law rather than following it, very general confusion has arisen as to the liabilities under the statute of the two classes into which these transactions may naturally be separated. In the draft submitted the effort was not so much to suggest radical changes in existing law as to simplify the present code; first, by eliminating

from chapter one hundred and fifteen everything pertaining to disability or death benefits, restoring that statute to its original condition and purposes, and then to absolutely separate assessment insurance as effected by business corporations from similar transactions when conducted by lodges, or like organizations. This difference was clearly recognized and defined, and separately classified as "assessment insurance" and "fraternal beneficiary organizations," with the provisions of law applicable to each distinctively arranged. The drafts included also the statutory requirements, entire, in relation to incorporation, the purpose being to form two complete statutes presenting whatever information was necessary for the organization of corporations of either class, and their government and control, so far as affected by law.

No new assessment corporations have been organized in Massachusetts during the year 1887, although one has been incorporated the present year. An attempt was made to galvanize into life the defunct fraudulent "People's Benefit Association;" a new name was selected, but the old managers who fathered the project could not so much as keep fraud and falsehood out of the preliminary papers submitted to the department, and the scheme came to grief without securing authority to prey upon the public.

#### Assessment Companies in Court.

The affairs of the two assessment companies in the hands of receivers, mentioned in the last report, are wearily dragging their way. Of the Home Mutual Aid Association, having death claims to the amount of some \$45,000, with total assets, including emergency fund, of about \$9,000, the receiver writes as follows:—

Boston, March 30, 1888.

Hon. George S. Merrill, Insurance Commissioner.

DEAR SIR, — Since I last wrote you I can report progress in closing up the business and affairs of the Home Mutual Aid Association. Two policies of five thousand dollars each had to be settled or disposed of before anything could be done toward ascertaining the amount due each creditor; and for this reason, — the two policies were not, in my judgment, valid policies. They, nevertheless, were held by an attorney in Salem, who claimed that they were good. I tried to get the party claiming the policies to bring suit against me to test them, but he would not, although he threatened to. I have to-day

settled them for one hundred dollars. The dividend upon them would have amounted to nearly two thousand dollars.

I hope now to close the affairs up in short order.

I am yours respectfully,

Chas. Steere,
Receiver of the Home Mutual Aid Association.

The affairs of the Massachusetts Safety Fund Association have been complicated by the peculiar conditions attaching to the so-called "safety fund" in the hands of a safe deposit company.

The following letter from the receiver presents the latest information in regard to the corporation:—

Воѕтом, Feb. 13, 1888.

Hon. George S. Merrill, Insurance Commissioner.

DEAR SIR, — Your letter of February 11 was duly received, and I reply at once.

The position of the affairs of the Massachusetts safety fund Association is as follows:—

Since my last communication to you I have had several hearings before the Supreme Court of Suffolk County, in one of which the validity of certain alleged attachments by trustee process and other alleged liens on the safety fund were considered by the court. And that portion of the case was ordered to be reported to the full court for final determination.

On January 24 last I had another hearing before the court as to what disposition should be made of the safety fund. The safety fund, with the accrued income, on Jan. 1, 1888, amounted to \$19,180.56, which fund, according to the opinion of the court, is to be subjected to the payment of certain outstanding claims against the association for rent, clerk hire and certain incidental expenses, which probably will not exceed \$700, leaving the balance of the fund to be disposed of (less administration by the receiver and attendant charges) to be determined by the court.

Two questions arise,—if the attempted attachments and liens are declared to be void, then the fund is to be either distributed pro rata among the persons holding death-claims, or else is to be refunded to the certificate-holders, who contributed thereto.

This matter has also been ordered by the court to be reported to the full court.

In accordance with those orders I have prepared a very full report, which has been signed by the justice of the supreme court.

The papers are being prepared for the full court and will be presented to that court, and I think be argued at the coming March

term, when I trust that the questions of law involved will be fully answered by that court.

At the time of the dissolution of the association by the order of the court, to wit, on Feb. 8, 1886, there was outstanding against the association death-claims to an amount exceeding \$87,000, many of which are questionable. Since the dissolution other deaths have occurred. Whether the court will allow claims under those recent deaths to be charged upon the fund, in case the court shall decide that the fund is chargeable with death-losses, I am unable to give you any information.

From the best information which I have, I think the different interests involved in the case will be fully presented to the court and argued by counsel representing the respective sides.

As receiver, I reported to the court that, in my opinion, it would be useless to attempt by general assessments to collect any money with which to pay death-losses or any portion thereof; that the great majority of the certificate-holders were people without much means and were not possessed of property that could be reached in payment of assessments, with which opinion the court concurred. The case goes before the full court upon that representation, and that the death-losses cannot be paid in any part unless the fund can be appropriated therefor.

My duties as receiver preclude me from taking any position on either side of the questions involved, but only to see that the matters are fully presented to the court, which I think has been done in the report which I have prepared under the instruction of the court and adopted by it.

Whatever decision shall be arrived at by the full court, unless it shall be decided that the attachments hold the fund, the case will have to be sent to a master; because, if the fund is to be appropropriated toward the payment of death-losses, the amount of the validity of the death-claims and the persons to whom they are payable will have to be determined in the first instance by a master, and then acted upon by the court.

But if it shall be decided that the fund must be returned to the certificate-holders generally, then a master will have to determine who are the certificate-holders to whom the fund is to be paid, and the amount of the claim of each.

I think the above gives you all the information which is essential and which can be of any benefit to the certificate-holders in general.

The case in which all the proceedings are pending is Burdon et al. vs. Massachusetts Safety Fund Association et al., No. 1589, equity docket.

Very respectfully,

CHAS. ROBINSON, Receiver.

In May, 1887, the Springfield Life Assurance Association of Springfield and the Equitable Mutual Relief Society of Boston, in accordance with the provisions of the assessment insurance act of 1885, ceased business and transferred to and reinsured their members in the Bay State Beneficiary Association of Westfield. The latter corporation applied to the superior court in Hampden County for the appointment in each case of a receiver, asking that the emergency fund of both these corporations be transferred to the Bay State. Legal complications have arisen as to the latter, and the matter is yet undetermined.

#### THE ORDER OF THE IRON HALL.

My predecessor, early in 1887, through an official circular, warned the public against the illegal schemes of the Order of the Iron Hall, an Indiana corporation with a Massachusetts branch which had procured a charter under chapter 115 of the Public Statutes, but which in all matters was subordinate to its Indiana Later in the year, the then commissioner invited the attention of the attorney-general to the business transacted by this organization, and asked that the courts be invoked to restrain further operations of the order; the law officer of the Commonwealth, in an opinion published in the last report, affirmed the illegality of the transactions of the Iron Hall and was about to apply for an injunction. The officers of that organization thereupon came in with a plea for a stay of proceedings until they could present to the next Legislature an appeal for such enlargement of the statute as would permit the order to continue; this was finally granted, upon a pledge that no more certificates should be issued unless the General Court should so determine.

The organization made petition to the Legislature now in session, and the matter occupied the attention of the insurance committee during several days, Hon. John Haskell Butler and ex-Governor Robinson appearing as counsel for the Iron Hall, and presenting elaborate arguments therefor.

The project, grotesque as are its financial phases, has been urged with such persistency, and to the already delusion of a considerable number of men and women in Massachusetts, and the questions involved possessing such permanent interest, that some of the suggestions thereon, made by the Commissioner to the joint committee on insurance of the Legislature, are herewith appended.

Mr. Chairman and Gentlemen of the Committee: -

At the request of the committee, and in obedience to my sense of public duty, I desire to make a few simple suggestions in regard to the proposition now pending. I feel the embarrassment of coming here, compelled to differ from the two distinguished attorneys of the Iron Hall who have presented their case so ably, - both of them honored in the Commonwealth, one, perhaps as well known as any in Massachusetts as a representative society man, and the other, one who has won and worthily worn the highest honors that the people of the Commonwealth could bestow upon him. But while I make no criticism, and use the word "attorneys" in no invidious sense, - recognizing the value of that profession to the Commonwealth, - I wish the committee to bear in mind, and no less the people interested in this hearing, that these two distinguished citizens of Massachusetts come here as attorneys for the Iron Hall; not in their capacity, the one as the representative, perhaps above all other men, of the fraternal societies in the Commonwealth, and the other in the honors he brings to us from the positions he has held, but as the attorneys for that organization, to present to this committee and the Legislature the claims of the Iron Hall for the legislation it seeks. Of the entire membership of all the fraternal associations not one outside the Iron Hall has asked Mr. Butler to come here to plead for the latter. In all the length and breadth of the Commonwealth not a single man or woman, so far as it appears, who is not a member of the Iron Hall, has besought ex-Governor Robinson to appear in this matter. Both gentlemen come as connsel, and the same respectful consideration is to be given to their arguments as to attorneys in court pleading for their clients.

The Insurance Commissioner is here only as a servant of the public, and solely in his position, at the head of a great department closely allied to this class of business, and instituted by the Commonwealth for no better purpose than to stand between the selfish schemes of men and the great mass of the people. The present Insurance Commissioner of Massachusetts, it need hardly be said to you, gentlemen, is in hearty accord and sympathy with the fraternal beneficiary organizations. I belong to one of them, and have held the highest office in the gift of the fraternity; and during my incumbency I spent a considerable portion of my time, at my own expense, in traversing the State, presenting the views, purposes, plans and objects of fraternal associations to the people of the Commonwealth, urging them to become members; and it is because I believe that these fraternal beneficiary organizations are doing in our Commonwealth to-day an amount of good beyond human computation, because I know that they are carrying to bereaved hearth-stones in this land, in the hour of supremest grief, one consolation, - not the best, but yet of incalculable comfort to the little ones and widows, in the form of thousands of dollars paid in times of sickness and death, preventing the home from being disrupted, and the widows and orphaned ones from being driven out. And I speak against the Iron Hall largely because of my interest in the fraternal beneficiary organizations of the Commonwealth; because I believe that if the Legislature of Massachusetts shall throw around the speculative scheme of the Iron Hall the official indorsement of this State, declaring it just and proper and legitimate and right, and its project to be commended to the people, from that day you set the seal of doom upon every beneficiary fraternal organization in the length and breadth of our Commonwealth. The two systems cannot stand side by side. They have no fraternity or sympathy with each other; and if this great Commonwealth is to put the seal of its approval upon this scheme of speculation, then I repeat, the day has come when you have given the death blow to every genuine fraternal association here. So far as the sick benefits of the Iron Hall arc concerned, so far as all of its fraternal work similar to that which the legitimate fraternal associations are doing, everybody bids it God-speed; and when it is suggested here that the Legislature should not pass an enactment that would hamper the members of that order in their great work of beneficence, it is an imputation upon the intelligence of the legislators of the Commonwealth to suppose it possible in Massachusetts that any legislation could be had that should hinder any scheme of beneficence within the length and breadth of its territory. If the Iron Hall wishes to pursue its scheme of beneficence, so far as it is a scheme of beneficence, it has only to go straight on about its business. There is law enough to-day for every fraternal organization in this Commonwealth. The Iron Hall can promise its members employment, watch by their sick-beds, pay them their weekly stipend in case of sickness, and pursue every variety of social and fraternal work. There is nothing in the statutes of Massachusetts which hinders it from doing every portion of the work which is of beneficence, and it need ask for no legislation for it.

My friend, the junior counsel for the Iron Hall, was asked during his opening argument if he belonged to the Iron Hall, and if he had contented himself with a reply merely, I would not now have alluded to that answer of his. But my friend Butler said, no, he was not a member of the Iron Hall; in fact, he had a prejudice against it until its officers came to employ him as counsel before the committee, and then he examined into the matter; and upon that examination—I don't know how many weary nights he spent over it—he concluded

it was all right. Now, if there is any one man in Massachusetts, from Cape Cod to Berkshire, and from the New Hampshire and Vermont to the Connecticut and Rhode Island line, who is recognized as a society man, it is John Haskell Butler. In the early days of these fraternal organizations he became interested in their work, and he has indorsed them and become a member of almost every one of them. He has been Grand, if not Supreme Dictator, of one, and I don't know how many offices he has held in others. At the last grand session of the Ancient Order of United Workmen he was chairman of the committee on laws, which position he would not have held had he not been thoroughly versed in the underlying principles and laws of these various organizations, and entirely conversant with their good points. While thus specially interested in all these associations along comes the Iron Hall, a new organization, offering wonderfully greater benefits than any other had ever presented, and for six long years he has had a prejudice against it. But when it wanted him here, he became suddenly converted. In all history, sacred and profane, there is but one instance of a conversion like unto this. When that retainer of the Iron Hall reached the desk of Mr. Butler, then, like Saul of Tarsus, on the way down to Damascus, he saw a great light, and with precisely the same result, - he became totally blind.

Now, in all this hearing, nine-tenths of the so-called evidence and three-fourths of the argument have been simply to befog the question. If the Iron Hall is doing the same work as any other organization there would be no need of more legislation, — no necessity of showing how a man felt out here in Cambridge who lost one of his fingers and received a disability benefit. Every one would say that was a good thing to do. There is no opposition to that, nobody finds fault. It needs no additional law to do that. It can watch beside sick members and aid them in procuring employment as it is. But it is because the Iron Hall has one feature widely divergent from every other organization that it is compelled to come here and ask special privileges from the Legislature.

Chapter 115 permits the payment of disability and death benefits. This is the work of every one of the fraternal societies; but the Iron Hall pays nothing—except to return the pittance a member has paid in—to the widow or the orphan; nothing for these, but a promise of \$1,000 to the continuing members. No death benefit, nothing for the bereaved ones, but a bait for the fortunate living.

This is not a question of sentiment, but of sense; not a question, as you have been told, of the universal law of average, but of the eternal law of ability and possibility. It is not a question of the 'fatherhood of God and the brotherhood of man,' which expression

has been rolled out here with such unction, but a question of the multiplication table; whether the Iron Hall can do, and should be allowed to attempt to do, what it asks the Legislature to sanction.

Now one significant fact just here: You had a hearing a week ago, and another day before vesterday, in regard to the assessment insurance laws and the fraternal beneficiary laws of this Commonwealth. At those hearings, when the question was under consideration of what should be done in relation to a new law, or of change in the present law for the various beneficiary fraternal organizations of this Commonwealth, the Ancient Order of United Workmen, the Knights of Honor, the American Legion of Honor, the Golden Cross, the Good Fellows and the United Friends, all were here. Was the Iron Hall present with any representative when this question affecting all the beneficiary organizations of this Commonwealth was under discussion? Except to ask for this special legislation not a man was here representing the Iron Hall. What did that order care for the matters affecting the genuine fraternals? On the other hand, while the Iron Hall has for the last eight months been under the harrow from the attorney-general's decision that it was illegal, and it has been well known that it was coming to this committee to ask for new legislation, no single representative of all the great fraternal organizations has come here to ask in their own behalf, on behalf of the stronger and more important organizations, that anything should be done for the Iron Hall. These two facts alone show that the Iron Hall stands by itself, and is not to be put into the same class with the beneficiary organizations.

Now, there have been two or three matters much talked about here that a simple word will clear up. It has been said that the Iron Hall, by paying out so much in the course of seven years in sick benefits, will thereby reduce its final liability at the end. But let no man think for a moment that it thus decreases its liability during the seven years. To pay out something to-day for sick benefits, and deduct from a certificate payable by and by, simply advances payment on a debt, and does not reduce the amount to pay during the period.

It is of no possible consequence that the Iron Hall, as has been reiterated here over and over again, does not promise absolutely to pay one thousand dollars in seven years. It says "not exceeding one thousand dollars, and as many assessments as we please to meet it." But what is the inducement to join? Is it that members will pay in three hundred dollars, and possibly get four hundred dollars at the end of that time? or collect nine hundred dollars and pay one thousand dollars? That is not true, gentlemen. While it does not absolutely agree to pay one thousand dollars, you know and I know

what it means. Every man whom I have asked, "What did you understand by this endowment feature of the Iron Hall?" has substantially replied: "By the payment of three hundred dollars I expect to receive one thousand dollars at the end of seven years." Mr. Somerby, in his statement here before the committee, spoke continually about what the expectation was, and declared that upon the basis of eighteen assessments a year the order could, at the end, pay the members \$1,000. Therefore, why waste time in saying that it doesn't actually promise that much? All the certificates are not for \$1,000, but it makes no difference in the finances of the thing. A \$1,000 man pays \$2.50; \$800 costs one-fifth less; so that if you grade all the certificates on the \$1,000 basis and an assessment of \$2.50 it amounts to the same precisely. Five certificates of \$200, at an assessment of 50 cents each, would realize just the same as one of \$1,000 at \$2.50.

The Iron Hall claims to be a Massachusetts corporation, but the Supreme Sitting has absolute authority in everything. The Massachusetts order cannot issue a postal card or any literature without the consent of the Supreme Sitting. Everything is tied up there. All the money goes there, except the reserve fund, and even that eventually.

An objection has been made to the word "white" in the constitution, and the protest is sound. I know that the same exists in some of the fraternal organizations; I found it in one to which I belong. I did not know of its presence there when I joined or I would have refused to become a member, and if I become a member of the Imperial Council a motion to strike that word from the constitution will be at once presented. But so long as these associations pursue only the work permitted by law, of caring for the sick, the widow and the orphan, the policy of the Legislature of Massachusetts has been to regard them as family affairs and to put no restrictions upon their form of organization. But when, in the light of the Christian civilization of the nineteenth century, an organization comes pleading for special legislation for purely speculative purposes, then I submit that it is not in accordance with the ideas of this old Commonwealth, it is not in harmony with the vaunted principles pertaining to the "fatherhood of God and the brotherhood of man," to give the indorsement of Massachusetts to such organization, while it inscribes upon its banners the legend, "Let no colored man apply." And even so far as the purely fraternal associations are concerned, I desire to give fair notice, that if anybody has an idea of forming any more of these organizations, if the bill now before the committee passes the Legislature, putting the authority of granting new charters into the hands of the insurance commissioner instead of the commissioner of corporations, so long as the present Commissioner holds office no charter will be granted to corporations who inscribe on their banner the legend, "No colored men wanted."

In both the evidence and argument much was said about the \$1,000 being only an incident. Mr. Butler said so. My friend Hill from Salem said he never mentioned it when asking people to join. Mr. Holt of Lowell said he never promised it, and in reply to a question by a member of the committee, he gave you, with so much owl-like ponderosity, the marvellons bit of wisdom, that "seven was a perfect number." The only man who did say that the one thousand dollar feature was a prominent one was my friend, Dr. French of Lawrence, who had evidently not been coached. The doctor is a little hard of hearing, and so didn't eateh the point and purport of the remarks of the other witnesses, and he blurted out that he urged his adopted son to go in for the thousand dollars specially. Now, is the general statement true? Is it true that the Iron Hall has flourished and grown great upon the same sort of business as the other societies are doing? Let us see. Here are some of its circulars. What do these say? I find nothing here about watching with the sick, nothing in big head-lines in regard to anything except that it will pay \$1,000 at the end of seven years, less the benefits received during that time. That is what is made prominent. And here, again, is what it has adopted for a seal, to be put upon all literature sent out officially from the Iron Hall. Did it copy from other organizations? Here is the seal of the Ancient Order of United Workmen — the largest to day, and perhaps the strongest, among all the fraternal organizations. The seal is surrounded by a wreath, and here is the Bible, with a burst of sunlight over it, the inscription, "Who is my neighbor?" and clasped hands beneath. This is what the Ancient Order puts forth to its members as the one conspicuous thing to catch the eye when one sees its literature. What did the Iron Hall adopt? Somebody sitting by the side of a sick member, with the inscription, "\$25 to those who are disabled"? Oh, no. Here is a safe - emblem of finance - and on top of the safe "\$1,000," and underneath it, "in seven years." This is the seal, -the one conspicuous thing the Iron Hall wishes to have stand out in the face of the people, and that is perfectly characteristic of the doings of the order. The \$1,000 is the principal feature. The \$1,000 is the great inducement to join, and is the only feature for which it seeks legislation from the Commonwealth.

Much was said here about the quarrel between Mr. Somerby and Mr. Lewis. I was puzzled to know what that was put in for. The only fact shown was that at the end of the first two years of the Supreme Sitting of the Iron Hall Mr. Somerby found a misappropriation of the funds, and had the officers turned out. His bosom

friend, Lewis, was put in. At the end of four years Mr. Somerby made another revolution, and until he took hold last time, we are assured by him that the books and papers of the order were kept in a shocking condition. And just here, my friend from Salem, Mr. Hill, states as one reason why the Iron Hall can do all it proposes that it doesn't pay any high salaries, that the management is wonderfully economical. I have here the official report of the Supreme Sitting, and in it I find that during the two years Mr. Somerby was vice-justice he received \$3,400 for salary; and I saw in the figures, - the senior counsel for the Iron Hall wanted everything to be very open and above-board, and was afraid that somebody else wouldn't be, - I found in the details that Mr. Somerby also received money for travelling expenses. I looked in the tables to learn the amount, but there wasn't anything put down. I thought that singular, and I went through the book to pick out the items. See how cunningly they put it in, - "F. A. Somerby, Supreme Vice-Justice, salary, \$3,400." The travelling expenses I found, by going through all the items, \$4,205.83. Instead of being put in beside Mr. Somerby's name in the abstract, it is stuck down here at the bottom, charged to "Special Agent." That is the open, above-board, and frank, honest way in which the transactions are carried on. And I find that Mr. Somerby, who comes here now simply out of great regard for the members of the organization in this State, is being paid a salary of \$3,000 for his services. Well, I think he is worth it. Any man who can, from his own brain, coin such a marvellous system of mathematics as he has presented here to you, - a scheme of finance such as the world never saw before, and never will again, any man who can so unctuously roll out that "fatherhood of God and brotherhood of man," is worth \$3,000. I think he earns his money. I confess that most that Mr. Somerby said wasn't of much consequence, and that it had no particular bearing on the principal question before this committee; and yet it illustrates the value of some other things he did say. He asserted that there was no old life insurance company to-day which, if it did not keep on taking in new members, could continue to the end and pay its liabilities. That illustrates the folly of a person who attempts to instruct others as to a matter of which he has no knowledge. The Commonwealth of Massachusetts has established a standard by which every company doing business within its borders is compelled to keep an absolute reserve so great that if they should close their doors to-morrow, and never take in another member, they possess sufficient invested assets to pay every member and have a surplus at the end; and yet Mr. Somerby brings that in as an argument to show how the Iron Hall can go on forever without any accumulations or reserve.

At a former session he gave the figures for the first and second years. I asked for the remaining years. He said he would give the figures as soon as he could procure them from headquarters. The next time he gave 1881, 1882 and 1883. He was very careful not to present the rest, in the later years, when the organization has grown, simply because he knew that if he put in the large increase of members over that little membership of the three first years it would have knocked his tabulation and the wonderful formula that he talked about higher than the famous kite of Gilderoy. His figures wouldn't have stood a moment before those later years. Was this action on his part accidental? Not at all. I find in the official report that some member of the Iron Hall requested, during the session of the Supreme Sitting, that the supreme accountant be ordered to make a statement of how many certificates will become due in 1888, 1889 and 1890. Now, in this frank, open and aboveboard association, where everybody knows what is going on, was there any objection to giving this knowledge to the members as to how many people had come in during these later years? But it was voted down, and the committee reported inexpedient to let this member know how much was coming due in the advancing years of the organization. Mr. Somerby says that it is morally certain that it can pay its obligations in this year of 1888. Nobody ever doubted it. It can pay, if the Massachusetts Legislature allows it to go on. Of course it can pay the few certificates that are maturing in 1888, if the Commonwealth will allow it. If one thousand men will consent to contribute one dollar each for the purpose, one man can be given \$1,000; but who is to pay the nine hundred and ninety-nine? There are eight hundred members left of those who joined seven years ago. The order has thirty thousand members this year, who will be assessed \$45 each to reach back and pay those men. Of course the Iron Hall can do it, if allowed. Nobody doubts that; but what of the hereafter?

Here is another piece of Mr. Somerby's figuring that isn't of much consequence except to show the curious contortions of that mathematical mind. He gave—and I asked for his own copy, lest somebody should say I didn't get it right—statistics of seven life companies. I suppose he took seven companies because seven is such "a perfect number." It would have been much easier to take the entire list, already added,—all the companies doing business in Massachusetts, New York, and up in Michigan where he has one of his residences. If he had taken the whole table he would have found the figures already made up for him. But he took these seven companies for some mysterious reason, showing 193,659 policies in force in 1880. During the succeeding seven years 245,828 were

added, making a total of 439,487; 144,327 lapsed, leaving 295,160, a net gain in the seven years of 101,501 policies. But Mr. Somerby figures only 52,169 policies increase in seven years. Well, let us see. They had 193,659 to start with, and 295,190 at the end of the time; 193,659 out of 295,160 leaves 52,169, does it? How did he get that mysterious answer? How did he attempt to find how many more policies there were at the end than at the beginning of seven years? Why, he took the number of policies issued during the term, and subtracted from that the number with which they started! That is, at the beginning of the year I have \$100 in the bank. During the year I deposit \$900, which makes \$1,000; from this I pay out \$800. My mathematics leave me \$200, or \$100 more than I started with; whereas he figures: I had \$100, put in \$900, subtract, leaves \$800. The bank books show that I have \$200, but Somerby says that I have \$800. And this is a fair specimen of this great statistician's computations. I didn't wonder that the senior counsel for the Iron Hall remarked to the committee that Mr. Somerby's figures were somewhat intricate, and he desired a week in which to look them over before making his argument. I was not surprised that he could not understand the process of subtracting the original number of policies from the new ones in order to get the net gain.

Again, Mr. Somerby was asked how he arrived at that formula of his - "my formula" he called it. He replied that he was the chief genius in getting up the marvellous scheme of finance. He went on to say that in the outset he sat down and took the results of certain English companies, accident companies, assessment and fraternal associations, and went on all the way through these alleged computations, stating that the first year's business of the original organization "was based" on those propositions; "and I found this, and I discovered that," he uttered interminably. This was in 1881, and every one of those tabulations that Mr. Somerby told us here he founded "his formula" on, extended all the way from 1881 to 1886, including compilations of fully five years after he made his figures. I do not wonder that he comes here boasting of his prophetic knowledge, estimating how many additional members there would be. A man who, in 1881, could formulate a scheme upon figures that could not be known to any other mortal till 1886, certainly can claim to be a prophet.

One of the Iron Hall witnesses, Dr. French, of my own city, declared that he prefers the certificates of the assessment associations to the policies of any old line company in existence. Well, I'll not waste time in commenting upon that extraordinary suggestion; it may stand as an illustration of the bulk of the arguments

in behalf of the Iron Hall. Then the doctor gave you another marvellous statement. If he hadn't been a medical man I should have thought he had blundered. The doctor said that in beneficiary associations every member died within seven years. He has been a member of some of these organizations fully nine years, and therefore must have died and been buried at least two years ago. Now, the doctor had two objects in wanting to have the Iron Hall go ahead. One was that boy of his. He wanted that boy to be sure of his \$1,000, when he was twenty-five years of age, to start in business with. And then the doctor has a great interest in the workingmen. Now, fortunately, Dr. French is possessed of a competency. There is no necessity for that boy to go into the Iron Hall to get \$1,000 with which to start in business. The doctor can afford to educate that boy and take care of him when sick, and give him \$1,000 or \$5,000, if he would make a good use of it, and hardly know that it made a hole in his bank account. But to secure to that boy \$1,000 in the Iron Hall, if he pays in \$300, will take \$700 out of the pockets of those poor workingmen whom the doctor has such a wonderful care for and interest in.

The Iron Hall is unlike the beneficiary associations in its participation in politics. For the first time in the history of any organization claiming to be among the fraternal orders do we find activity in elections. From its highest authority in this State was last year issued an official circular, bitterly assailing the late insurance commissioner for raising the question for the attorney-general to decide as to the legality of the transactions of the Iron Hall; and at the session of the State organization a resolution was unanimously adopted, calling upon the members of the organization to enter the election contest as an Iron Hall factor, voting only for candidates who were in favor of the legislation it demanded; and this was zealously carried out in many places at the polls. Massachusetts has been always so liberal in legislation for the genuine fraternal organizations that this extraordinary action could have been necessary only in behalf of a scheme of speculation.

In the question before you, gentlemen, there are but two propositions. Everybody agrees to what the Iron Hall is doing, except one thing; and in that is involved two questions.—a question of morality and a question of mathematics. The one is a matter of opinion; the other can be made so clear that any schoolboy in the Commonwealth may understand it, and I hope to make it thus clear before I conclude. The Iron Hall is not a life-insurance organization. It is not a life-beneficiary organization. It pays no benefits at death. It is taken entirely out from the category of associations that are formed under or for which chapter 115 was amended by the

General Court. So far as concerns one portion, of the work of the Iron Hall I desire no man to misunderstand me. I repeat again, of the work of the Iron Hall, except this question of \$1,000 in seven years,—in everything else of the work of the Iron Hall, I say to it, God-speed. But when I speak of it here, I am speaking of that side of it for which it comes to the Legislature and asks that the statutes of the Commonwealth may be amended, and special legislation given to it over other organizations. One thousand dollars in seven years has no possible connection with the work of beneficiary associations. It is a question of pure speculation, nothing more and nothing less; and every man who goes in does so because it promises \$1,000 in place of the \$300 he pays in.

If somebody is to draw out \$1,000 for \$300, somebody else pays that \$700. The Iron Hall has no scheme by which it can make money grow on trees. It possesses no widow's cruse of oil, renewing its supply from day to day. It is not able to repeat the miracle of the loaves and fishes; and yet if by putting in \$300 you draw out \$1,000, somebody pays that \$700, and the people who do pay the \$700 get no benefit therefrom. The counsel for the Iron Hall, with a significant gesture, threw something into his hat, or appeared to, saying, "The Iron Hall doesn't promise that if you throw \$300 into the hat and then tip the hat over, you shall get \$1,000." No; but the Iron Hall promises that if I pay in \$300, it will get ten more men, in the course of the next seven years, to put in \$300, and it will take the money from the others to pay me my \$1,000 out of the hat, if I get out first.

The Iron Hall can only pay this \$1,000 by lapses or increased membership. Here is a proposition that nobody, even in the Iron Hall, will dispute. If \$700 is to be added to \$300 it must be paid from one of two sources. There are no other means of revenue. It must be paid by lapses or by new members. If it is paid from lapses, then it is tontine; and Massachusetts, thirty years ago, placed her insurance banner a few feet higher on the staff than any other State in this country, and branded the principle of tontine as unjust, immoral and dishonest. She says to-day, to her old line insurance companies, You shall not do a tontine business. When ten men start in the race of life insurance, and by and by two, from poverty, because they have lost work, because their wives or little ones are sick, are unable to keep up their assessments, - then, if they fall out by the way, Massachusetts declares that the rich and the fortunate, because they are able to continue to the end, shall not put in their hands and grab the money which the poor have paid in, and thrust it into their own pockets. That is tontine; and Massachusetts has said that it shall not be done by her companies.

That is one of the phases of business that the Iron Hall comes here and asks to be allowed to do. We were told, day before yesterday, with some little emphasis, that the late commissioner, the former commissioner, the former insurance commissioner, while he had decided opinions of his own, when he came to the question of acting officially, brought to it "judicial determination." Well, I hope that with the going out of that life all the judicial determination did not depart from the borders of the Commonwealth. There seems to be some fear that it did. Here is what this judicial commissioner says about tontine. In 1833 the scheme of insurance known as tontine is thus referred to:—

That scheme of insurance known as the tontine, as recently practised by insurance companies, is reprobated by the policy of our legislation. Insurance corporations, chartered under Massachusetts laws, are prohibited to insure on that plan. Confessedly, it is a departure from the original idea of life insurance, which contemplates a benevolent provision for the families of the dead assured, while this device anticipates profits and benefits to the survivors at the expense of the natural beneficiaries of those who die. Baldly stated, in the language of the craft to which it bears a resemblance, a class of policy-holders form a pool, into which are put the forfeits of such as allow their policies to lapse for any cause, and also the dividends upon accumulations of surplus, due on account of the policies of those who die within the term. When the tontine period expires, the pool so made is divided among the survivors who have kept their policies in force. This procedure invites the attention of the legislator and moralist.

Here is another suggestion from Commissioner Tarbox, in the report of 1884, on this topic:—

From these clear premises the conclusion is inevitable that an insurance company can realize superior profits for some of its policy-holders only at the expense of its other policy-holders. What somebody gains, somebody else must lose. Massachusetts has signified, by just legislation, her disapprobation of such mercenary commerce, and sought to divorce insurance from speculation. All her laws against inequitable forfeiture rest on this firm base of natural justice.

That is just what the Iron Hall is illegally doing. The report for 1885 has three or four pages devoted to this topic. I will read only the closing words: "How tontine appears to divert the primary object of insurance must be clear to the dullest comprehension."

Now, if not from tontine or lapses, then the hope of the Iron Hall to make good its promises must be from new members. If so, it is absolutely,—I am sorry to differ from my friend, the counsel, who said it was not,—it is absolutely the scheme of Mrs. Howe's bank. What was that? On the first of July I deposit \$100. Mrs. Howe

agrees to pay me forty per cent. a year, semi-annually. On the last day of December you go in, Mr. Chairman, if such a proposition is supposable, and make a deposit of \$100, and Mrs. Howe takes \$20 of it with which to pay me my interest on the deposit of the July preceding. The Iron Hall proposes to take the assessments of the membership of to-day with which to pay the accrued benefits of seven years ago; just precisely, in principle, what Mrs. Howe's bank was doing in the city of Boston. A prominent member of the Iron Hall said to a friend of mine, who asked him, in answer to his plea for him to join, "Why, sir, how are you going to pay this?" "From the new members who come in." "But what of the last ones?" "Well, you look out and not be one of the last ones."

Test this Iron Hall problem on something else. Try it in a savings bank. "A rose by any other name will smell as sweet." Call this a savings bank, and not a great scheme of beneficence founded on the "fatherhood of God and the brotherhood of man." Call it a savings bank. Men deposit in the first year, and in subsequent years, and so it runs on. At the end of seven years, supposing you allowed it, the bank is to pay two hundred and thirtythree per cent. interest for the term of seven years to the first men, using the accumulations of the new men to pay those who commenced seven years ago; how many men would come to the Legislature and ask that this scheme be legislated into existence and power under any name? But the name is nothing; what are they doing? is the question. You must not license a person to do two kinds of business, good and bad. You must not say that because the Iron Hall is doing a certain work that is good, therefore it may do another work that is altogether bad. Its beneficence and its speculation must be separated, and each must stand on its own basis before the Legislature.

But it is said. "Many respectable people have gone into the Iron Hall, — many honest people have gone into it." True. Some of the best friends I have — men whom I respect, men whom I know would not knowingly or wilfully be in a dishonest scheme — are in the Iron Hall. Deluded souls who dream of heaven. But turn back thirty years, Mr. Chairman. Thirty years ago, away back in the fifties, Massachusetts passed a statute for what was known as the Loan Fund Associations. What was that scheme? Members bought shares, paid admission fees and dues, and each month the accumulated money was loaned to the members who would pay the highest premium for it. The inducement was that the contributing members were to receive a very large rate of interest for their money, while the borrowing members were to secure their loans for practically nothing. Both parties to the transaction were to reap a

great harvest out of their dealings, the one with the other. The reports of the insurance department of those days gave page upon page of figures, showing the absurdity of the scheme, but it flourished, and as good men as the Commonwealth possessed were prominent in it. In my own county, one of honored name, Stephen C. Phillips of Salem, was president of one association; and yet, after five or six years, these Loan Fund Associations, as was inevitable, came down with a crash, and took out of the pockets of the workingmen for whom they were originally devised, so it was said, hundreds of thousands of dollars in this Commonwealth, and brought disaster and ruin to everybody connected with them.

Let us have just a few cold figures, and I will leave this subject. I have spoken of the morality of the tontine side. Now take up the question of the multiplication table. Fortunately, we are not dependent upon Mr. Somerby for the "universal law of average." The assessment insurance organizations of the United States have published a table from actual experience for nine years. They have shown just what the law of average is in assessment insurance. Here, then, we have something reliable and tangible - not figures made six years before they existed. The lapse, we find, is fiftythree per cent. in seven years. The Iron Hall shows fifty-four and a fraction. Now, Massachusetts cannot afford to say, and I believe that Massachusetts is not likely to say, that any organization may contract to do that which, in the ordinary test of mathematics, it cannot carry out until the end. Now let us see. The Iron Hall says it can this year pay the eight hundred and twenty men who are left from seven years ago. Granted. Let us see what it can do in the future.

On the first day of January, 1887, the Order of the Iron Hall is stated to have had 28.500 members. Allowing fifty-three per cent. of those to drop out, to lapse, during the coming seven years, there would be then remaining 13,395. To pay these the promised endowment would require \$13,395,000. The question of sickness on the part of this number in no way affects the financial result; it requires a like amount of money as a whole, whether more or less be advanced for sickness. Now, what can the order realize towards payment of the above sum? The lapses will surely be in the early years, almost entirely within the first three. Very few members having held on thus long, with the hope of \$1,000 at the end of three or four years more, will drop out. Average the 15,105 lapses during three years, say one and one-half years' membership to each. Now, to be more than liberal to the organization, these estimates will be made upon the basis of twenty assessments each year, two more than Mr. Somerby declares to be ample. Twenty

assessments per year at one and one-half years each for the 15,-105 lapsed members, would realize \$1,132,875. From this must be deducted the amount paid to these members who go out for sickness. Take Mr. Somerby's own estimate of an average sickness of four and one-half days per year to each member, and we have for the lapsers 14,492 weeks, which, at \$25 per week, amounts to \$362,300. Deduct this from the amount of payments above, and \$770.575 remains as the net sum to the order from the members who go out. Now, the remaining 13,395 will pay, with twenty assessments per year, for the seven years, \$4,688,250. Add the amount gained from lapses, and we have \$5,458,825 as the utmost sum that can be secured seven years from now with which to pay the \$13,395,000 due the remaining members of the present 28,500; only \$7,936,175 short.

Can any one find any flaw in that application of the multiplication table to the Iron Hall scheme? Well, test it by another bit of arithmetic. According to the "formula" of Supreme-Justice Somerby it will require practically all of the anticipated additions to the membership - 1,500 per month - of 1888 to secure the payment of the certificates maturing during the year. Average the 18,000 anticipated new members for 1888 at half the year, and we have 9,000 to add to the membership of January 1, equalling 37,500 as the number required for assessment to meet the payments of \$1,000 each to the survivors, at the end of seven years, of the original 1,800 members, or twenty-one times the original number required to make the first seven years' period payment. Is it not, then, perfectly fair to as-ume that it will require twenty-one times the present number to make payment at the end of the next seven years, and so on? If so, seven years from this time it would be needful that the order have 787,500 members, and in another seven years 16,537,000, and at expiration of the third period 347,277,000 members!

But, it is demanded, if the Ancient Order of United Workmen has been able to go on for twenty years, paying its certificates upon a basis of fifty cents for \$1.000, why not the Iron Hall, with an assessment five times as large? Simple enough the answer. The Order of United Workmen pays only at death; the Iron Hall promises to pay every one who is alive at the end of each period of seven years. The average annual mortality of the Workmen is nine in each 1,000. For each 1,000 members remaining in the seventh year that organization would be required to pay nine certificates; the Iron Hall promises to pay to the entire 1,000!

Is there any schoolboy who cannot perceive the preposterous folly of making a comparison between the liabilities of the two? Starting with the same membership, say 28,500, the lapses may be consid-

ered the same, although in the Workmen they will average a trifle longer membership; but this assumption is favorable to the Iron Hall in a comparison. Estimate the 15,105 lapsed members, as before shown, at two years each, and among these there would be 302 deaths while remaining in. During the seven years' membership of the remaining 13.395 there would be 843 deaths, or 1.145 in all the membership during the seven years' period, upon which the order will pay \$1,145,000. As before shown, the liability of the Iron Hall on the same membership would be \$13,395,000.

Now, as the assessments of the Iron Hall are five times in amount those of the Workmen, multiply the liability of the latter by that figure, \$1,145,000×5=\$5,725,000. Go back to the previous computation upon a different basis, and see how closely the latter figure approximates that before given as the utmost possible ability of the Iron Hall to secure funds with which to meet the promise of \$13,395,000.

But, comes the response, all this is upon the assumption that the Iron Hall is to close its doors now, stop growing, while the fact is that the order is to go on increasing. Well, Massachusetts cannot afford its sanction to a purely speculative feature of any organization that cannot meet this test. For benevolence, for fraternity, for sweet charity, some hazard may be permitted, but not in matters arranged solely for the financial interest of the individual

Well, let us test the growth theory by another bit of arithmetic. At the close of February the Iron Hall had 30,000 members, and the increase is now at the rate of 18,000 per year. To be more than fair, call the latter figures 15,000. Multiply this by seven for the growth of that number of years, and add the 30,000 members to start with, and we have 135,000 as the promised membership at end of the seven years' period from now. Deducting the fifty-three per cent of lapses, 63.450 would remain, requiring for payment at the end of 1895 the sum of \$63,450 000. The lapsing members, as before computed, at one and a half years each, and with twenty assessments per year, would contribute \$5,366,240. Their sickness, four and onehalf days each per year, 68,994 weeks, would reduce this \$1,724.800 leaving net \$3,641.440. The remaining 63,450 members, twenty assessments each for seven years, would contribute \$22,207,500. To this add the above sum from lapses, and the Iron Hall would possess \$25,848,900 with which to meet its promise of \$63,450,000, a shortage of the trifle of \$37,601,100.

It will be suggested in reply that this computation is excessive, being for the liability upon the membership of all of these seven years, while, in fact, at the end of the period the only certificates payable are those of the members who came in during the first year. True, but the deduction for lapses was made for the entire period,

fifty-three per cent. upon the total number, and not merely upon the first year membership. To omit these, and credit the Iron Hall with only the equitable proportion for each year's membership according to its duration, would enormously increase the liability over the foregoing estimate.

But the above-calculated liability has been absolutely incurred, although not fully accrued. To project this enormous burden over six years of the future, extends, but does not lessen, the liability. It only puts off the inevitable day of reckoning. It is simply preposterously absurd to claim that any organization can go on through the years with swiftly growing membership, piling up this vastly increasing liability, millions upon millions, and hope to escape final disaster. It is the folly of foolishness to claim that accumulation of liability can be satisfied or liquidated by still more enormous liability. Debt does not pay debt.

Had the Iron Hall been willing to make public its membership statement for the three years past instead of adopting a policy of concealment, even from its own members, it would then have been an easy question of arithmetic to show its absolute liabilities and resources, upon any basis of growth, for future years from one to twenty. But its officers dare not expose its wild claims to any adjudication where the multiplication table could be applied, and therefore, to keep up the delusion of the public, the number of members is carefully concealed, while its advocates juggle with figures from which fact is eliminated, hoping to escape detection.

Take another computation. At a meeting in Cambridge, Dr. Brown was put forward by the Iron Hall to explain to the public the method by which the order could redeem its promises in the payment of \$1,000 in seven years. He said, and this has been repeated over and over by the Iron Hall advocates, that each member had only to bring in four new members during the seven years to positively insure success. Four new members in seven years is a little more than a half member annually; call it the latter, giving the order the benefit of the fraction. With the 30,000 members at close of January increasing fifty per cent. annually, at the end of the seven years' period the roll would number 512,577. Deduct the lapses, and 240,-911 would remain, requiring for payment \$240,911,000. The lapsing members would contribute, 271.688 members, one and one-half years of twenty assessments, \$20,375,100; deduct for 261,966 weeks' sickness \$6,541,100; and there is realized net, \$13,831,000. To this add, from 240,911 stable members, twenty assessments each for seven years, \$84,318,850, and we have \$98,147,850 as the total ability of the Iron Hall with which to pay \$240,911,000, a shortage again of only \$142,761,150.

The greater growth, the greater failure. Let us make one more calculation We have heard scores of members of the Iron Hall argue in favor of a yet more rapid growth as the sure foundation of stability. Each member is to bring in four new members annually; that increases the membership fivefold each year. Apply a bit of the multiplication table to that proposition; 30,000 members now,  $30,000\times5=150.000$  in one year; 750,000 in two years; 3750,000 in three; 18.750,000 in four; 93.750,000 in five; 468,750,000 in six; and at the end of the seven years' period 2.343,750,000. Now, deduct the fifty-three per cent. of lapses, and there would remain to be then paid \$1,000 each 1,015,625,000 members, requiring in cash—and this in the year 1895-\$1,015,625,000,000,—a million million dollars!

Now, it has been said in the argument before the committee that the Legislature ought not to cripple an organization in its great work of beneficence. That is not the question. The question is, first, whether the Legislature will allow the Iron Hall to do this speculative business. If the Iron Hall, by its new membership from year to year, can do this without any accumulations, which Mr. Somerby says are necessary for every old line company - if you allow the Iron Hall to go on and do this speculative business by making the 28.500 members of to-day and the incoming members of the year assessable for the remnant of 1.800 men of seven years ago — if the Commonwealth is to put the seal of its approval upon that, the Commonwealth must repeal its carefully guarded laws in relation to the old line insurance companies, and allow them to pull down their accumulations and distribute them among the people who are to-day policy-holders, because the old line companies do not need a dollar in the world if the Iron Hall can go on and pay the debts due from seven years past out of the membership of to-day, and expect to pay the debts of to-morrow out of the membership that it hopes to accumulate during the seven years to come.

It is pure nonsense to ask that great insurance company in New York, for which the counsel for the Iron Hall is also attorney, to keep eighty or one hundred million dollars intact, restricting it even in the class of its assets; it is nonsense to keep those millions piled up there if this scheme of the Iron Hall is to go on, and the Commonwealth is to give it indorsement. Thirty years ago Massachusetts placed its insurance banner higher than any other Commonwealth in our land. Massachusetts said that one man, simply because he associated himself in an organization with another, should not clutch with his fingers the accumulations of his unfortunate neighbor when he dropped out, and sweep them into his own pocket. Massachusetts said that tontine business should not be

done by any company chartered within its borders, even with millions behind it; and I say that this scheme of the Iron Hall involves first an immorality which Massachusetts has stamped upon — the tontine business; and secondly, an utter impossibility in mathematics. There is no possibility of ever realizing in years to come the promises that it is making to the members of to-day. It can do it this year, and possibly next year, because in the first three years very few came into the order. But you cannot make any system of tabulation, you cannot find from any method of division or addition or subtraction, how the Iron Hall in the years to come can go on accumulating piling up membership upon membership, and assuming new and vaster obligations each year of its existence, and hope that the time will not come when the whole fabric will come down with one mighty crash, and into it will go the hard earnings of the working-people of this Commonwealth.

Let the Iron Hall do its work of beneficence. But I believe, gentlemen, that this Commonwealth is not to put the seal of its approbation upon this \$1,000 speculative phase; is not to say to the people of the State that this portion of the Iron Hall's business is lonest and worthy and commendable or possible, and thereby induce hundreds of thousands of others of our people to come into it. If you do this for the Iron Hall, if you allow it to run savings banks without assets, and speculate to this extent, I say to you. gentlemen, and I say to the people of the Commonwealth, you will stab to its death every genuine fraternal beneficiary organization throughout the length and breadth of Massachusetts, and tear the very foundations from under these associations that to-day are doing so much good throughout all this State of ours. If the Iron Hall can be permitted by the sanction of the State not only to do all that these other organizations are doing, but if the Commonwealth by its Legislature goes out to the people and affirms a belief that the Iron Hall can also carry out this speculative scheme of a tontine endowment, paving \$1,000 at the end of seven years, then it will be able to hold out so much more, with the indorsement of the Commonwealth, than any real fraternal organization, that the rest must add this feature and go scrambling and tumbling in the mad race of speculation, or retire and leave that kind of business to the Iron Hall and its sister organization, Tonti. I repeat, gentlemen, the Iron Hall ought not to be allowed to do this speculative business. The Iron Hall cannot fulfil, in the years to come, the promises that it is making now, and therefore the Commonwealth, through its Legislature, ought not to grant any legislation that shall permit it to engage longer in this class of transactions.

With no possible interest in this question but what arises from a conviction of public duty and a regard for the protection of the people, in the name of the Commonwealth whose banner has heretofore been kept so clear and unsullied, in behalf of all the great fraternal beneficiary associations at whose life the Iron Hall is striking, and for the protection of the thousands of our people who are being delnded and in the end will be defrauded by the absurd, preposterous promises of the Iron Hall, I carnestly appeal to you, gentlemen of the committee, and to the General Court, to refuse to send from the halls of the Legislature this speculative scheme with the indorsement and approval of the Commonwealth.

### THE LATE COMMISSIONER, HON. JOHN K. TARBOX.

This report would be sadly incomplete without a word of tribute to the memory of the late commissioner, who died while holding this office, May 28, 1887, having just completed the forty-ninth year of his life.

A rare man was John K. Tarbox, most thoroughly appreciated and loved as best known. To the writer - who for months slept beneath the same bit of canvas or shared the same blanket, with only the sky for a covering and the stars as evening candles, away from the restraints of society and friends - the strength of his character, the conscientiousness of his convictions, the unfaltering honesty of his life, shone with a realism and a lovableness born only of the sturdiest manhood. Possessing decided literary tastes and a strongly poetic nature, Mr. Tarbox early developed unusual ability as a writer, his pointed argument flowing ever in graceful sentences, while his impassioned oratory made him among the most persuasive and popular platform speakers. He was instinctively a partisan, indeed, firm in the honesty of his convictions he naturally deemed his own view upon any public question as perforce the right one, and threw himself at all times into its defence with fiery impetuosity; and yet, while urging his point with the zeal of an enthusiast, he was ever ready to concede to an opponent honesty of purpose, and he was as faithful in his friendships as unswerving in his opinions. If sometimes quick to resent a seeming imputation, it rose from "that chastity of honor that felt a stain as a wound," and no one was more ready to acknowledge an error or atone for a hurt.

As a journalist he attracted attention by his earnestness of argument and brilliancy of diction; as an attorney, his singular devotion in making every cause committed to him his own, his loyal love for his profession and his scorn of bribery, gave him ever the confidence of clients and the respect of opponents; as a citizen, neighbor, friend, he was warm-hearted, unselfish, generous, kind; as a soldier he was zealous, tender, watchful, true and brave.

His public life has been his best work; into every sphere of duty he carried his earnestness of conviction, withal tinged with his strong partisanship, his intense faithfulness and high conscientiousness. No man would think of approaching him with any improper or unworthy consideration.

He had been a member of both branches of the Legislature, city solicitor and mayor of Lawrence, and a member of Congress, being chosen to nearly all of these positions by a constituency strongly opposed to his political opinions. In all the stations he filled, his singleness of purpose, unflinching integrity and absolute truthfulness could always be trusted, and he has left a wealth of memories which will be treasured in long years to come.

Mr. Tarbox was appointed Insurance Commissioner in April, 1883, and during the four years until his death he made a record of honest, persevering, painstaking, intelligent effort, and acquired a reputation not bounded by the confines of the Commonwealth he served. Entering upon his duties with no previous training in its special responsibilities, he began zealously the study of its requirements and the possibilities of its future; very soon he became so deeply interested that he pursued the work with a genuine and enthusiastic love, and has left an impress upon the insurance legislation of the State that will live for years.

During his long illness, when slowly but steadily and surely a form of paralysis was creeping over him, sapping his strength but leaving his mental faculties to gleam still brighter as contrasted with his physical condition, and at the last, mid great pain and suffering, with a heroism akin to that of the battlefield, and self-abnegation tinged with the spirit of martyrdom, Mr. Tarbox worked resolutely and vigorously on, ambitious to

complete the task assigned him by the Legislature of framing a new insurance statute, the excellence of which will be a memorial to his sagacity and wisdom. Life's close found him with the harness on, and he went at last as peacefully as one who says good-by when starting on a journey; "not as a quarry slave at night," but as one who "lies down to peaceful dreams."

Respectfully submitted,

GEORGE S. MERRILL,

Insurance Commissioner.

### REPORT OF EXAMINATIONS.

NEW ENGLAND MUTUAL LIFE INSURANCE COMPANY, BOSTON.
[EXAMINED MAY, 1887.]

The following exhibit compares the resources and liabilities of the company, with corresponding items at date of previous examination:—

### ASSETS.

The increase in the amount of real estate held by the company is mainly the cost of premises purchased for office and investment purposes in Chicago and Kansas City, and does not result from the falling in under foreclosure of depreciated mortgaged property. There is only a single instance of failure of prompt interest payment on mortgage loans.

There is nothing further in the condition and progress of the company which seems to require special mention. The prudence and conservatism of management are exemplified by the steady growth of business and the quality and sufficiency of the investments to protect its obligations.

# Massachusetts Mutual Life Insurance Company, Springfield.

[EXAMINED JUNE, 1887.]

The securities of the company were examined in detail and found to have been correctly reported in the statement of Dec. 31, 1886, and the accounts of the other assets were also verified.

Of the liabilities nearly the entire amount consists of premium reserve, and this was computed from the department registers, which vary only two policies from the number shown by the books of the company.

The following is a comparison of the items as found by the examinations in 1884 and 1887:—

### ASSETS.

				December, 1883.	December, 1886.
Real estate owned, .				\$1,425,550 00	\$1,109,567 0
Mortgage loans, .			.	2.131,087 00	1,933,132 0

Policies in force,				14,313	16,537

Between date of last annual statement (Dec. 31, 1886), to which this examination refers, and June 1, 1887, the following changes in investments have been made:—

Real estate sold, Bonds and stocks sold, Mortgage loans paid off, Collateral loans paid off, Policy Ioans paid off,	52,250 00 275,712 38 104,900 00 22,510 00	Bonds and stocks pur-	34,075 00
	\$618,313 19		\$798,831_31

Only one collateral loan is found to be in arrears, and very few of the mortgages. No item of the company's investments is conditioned upon a rate of interest less than four per cent., and only a few at that rate. Most of the real estate except the office building came into possession through foreclosure of mortgages at times of business depression, when it was impossible to sell the properties except at unjustifiable sacrifice. But it is not the policy of the present management to hold any considerable portion of the assets, beyond office accommodation, in this form of property.

Real estate judiciously selected may be an unexceptional investment for a portion of the assets of a life company, but when falling into possession as most of this has done, it is not usually of such desirable character, and in that view is being disposed of and converted into other forms of investment as rapidly as prudent sales can be made. This is in line with the

suggestions of former commissioners in their reports of examinations of the company's affairs. The progress made is indicated by the figures which follow: — At the time of the last triennial examination the department appraisal of the real estate owned Dec. 31, 1883, was \$1,425,550. Taken on the same basis on Dec. 31, 1884, it was \$1,524,239. In 1885 it was \$1,431,665. In 1886, \$1,109,567, and on June 1, 1887, \$958,276.

The evident excellent management of the affairs of this company, since the last triennial examination, merits commendation, and the results may well be a source of gratification to the policy-holders. The reduction in the amount of real estate in the sum of \$566,000 has been accomplished only by diligent persevering and intelligent effort; and it is clear by comparison that the sales have been largely from the less productive portion of this class of property. The other securities, excepting only the small amount of government bonds, all bear a higher rate of interest than four per cent., and the progress of the company, under the present management, towards additional solidity is a cause for congratulation.

## STATE MUTUAL LIFE INSURANCE COMPANY, WORCESTER.

[Examined as of October 1.]

The examination verifies the statement of Dec. 31, 1886, and compares the condition of the company on Oct. 1, 1887, with that at date of last previous triennial examination, as shown in the foregoing exhibit:—

						Dec. 31, 1883.	Oct. 1, 1887.
Real estate, .						\$37,500 00	\$75,500 00

Surplus, .						\$664,390 28	\$797,032 93
Policies in force,					٠	5.711	8,512
Insurance in force,						\$14,162,113 00	\$22,793,130 00

### REPORT OF INSURANCE COMMISSIONER.

It will be observed that the business of the company both in number and amount of its policies has increased fifty per cent. during that term, and the surplus has increased from \$664,390 to \$797,033, the latter amount necessarily estimated, as no valuation of policy liability has been made for date of present examination, but the estimate is believed to be conservative.

<sup>\*</sup> The charter, besides authority to transact a life insurance business, confers also authority to act as administrator, executor, etc., to transact what is known as a trust business. The relations of the two departments of the business are fixed by the provisions of the charter. The accounts are kept entirely distinct and separate. The entire surplus in the insurance department accumulates for the benefit of the policy holders. The only advantage, direct or indirect, which the stockholders can at any time have from the union of the two features of the business results from the fact that the management of the trust business, from which they derive their profits, is done for them without charge. This includes the interest on the capital.

### "MUTUAL RESERVE FUND LIFE ASSOCIATION," NEW YORK.

[Incorporated 1883. Commenced business Feb. 9, 1881.]

EDWARD B. HARPER, President. FREDERICK T. BRAMAN, Secretary.

Office, No. 38 Park Row (Potter Building).

### INCOME DURING 1887.

For membership	fees 1	receiv	ed at l	home	offic	е, .		\$355	50
membership	fees,	estim	ated,					* 93,702	30
annual dues,								319,142	15
assessments,								1,953,785	68

<sup>\*</sup> Estimated. The president of the company says in explanation: "We have no way whatever of knowing what proportion of the admission fees is collected and what proportion is waived. We are well aware from inquiry among our agents and general agents and managers that in very many cases the membership or a lmission fee is waived altogether. In fact, whenever competition demands it our agents do this. It is a perquisite of theirs and subject to their own disposal."
